Test Calls: Camera Corner/Connecting Point recommends placing a test call with all sites prior to the actual day of the call.

Camera Corner/Connecting Point is listed as a **Public Room** nationwide with several Video Conferencing and Bridging Services Companies.

These companies provide location services for people who need to find Video Conferencing facilities nationwide and/or worldwide.

Typically these companies can locate a **Public Room** within a maximum of 150 miles from a given city. In heavier populated areas it is typically 50 miles and in major metropolitan areas it can be down to zip code areas.

Public Room rental fees can vary from \$200 to \$400 per hour.

Camera Corner/Connecting Point typically provides point to point call capabilities – one location to one other location.

At times, based on the current unit in our Packer Conference Room, we can also place multi-point calls – our site connected with up to 3 other sites.

The Bridging Companies listed can connect several sites to each other. It could be one site to 10, 20 or more sites. Bridging can become extremely expensive
