

BalanceBox

Height Adjustable Mount System

- Fits Screens Up To 396 lbs
- 16" or 25" of Vertical Motion
- 30 Minute Install
- Maintenance Free
- No Electricity Required

Bring Touchscreens Within Reach

BalanceBox is a unique, height adjustable wall mount designed for large Interactive Touchscreens. Its patented spring system combines effortless glide with stability and control.

>> Great for All Ages & Heights

Users of any age can quickly adjust even the biggest Interactive Whiteboard to fit their height, so they can annotate and present with ease.

>> Wheelchair Accessible

Make sure every student can participate! BalanceBox brings interactive content within the reach of those who have special needs.

>> Streamline Installations

New school construction? Renovating current classrooms? BalanceBox lets you standardize electrical outlet heights across all grade levels, which simplifies your connectivity purchasing and installations.
