Upgrade Your Current Paging System

We know as an education facility you have much to communicate throughout the day. From school announcements to time bells to the potential of emergency alerts, a paging system needs the ability to handle and manage the multiple things you need to communicate.

Whether you're looking to update your existing paging system, or replace it completely, CCCP has expert staff who've helped educators get the most of their paging systems. As both audio visual and telephony specialists, we're able to take these skills and give you a fully integrated system to meet all your needs.

> *We are very pleased with our decision to use Camera Corner for new paging systems in our school buildings. It has been a professional experience including survey, quote, installation and follow up!*

A paging system from CCCP gives you the ability to:
- Integrate a paging system to any type of phone system
- Provide VoIP or Analog connectivity
- Provide multi zone paging systems with all call capability
- Crate multiple virtual zone groupings based off physical zones
- Utilize existing analog speakers
- Create a hybrid system consisting of Analog an IP devices
- Design and implement full IP paging solutions
- Create multi zone bell schedules with user friendly GUI with multiple schedules
- Implement IP devices with message scrolling
- Include panic buttons to broadcast per-recorded messages over paging system

We recently contracted with Camera Corner Connecting Point to upgrade our PA / clock / bells system at our high school. Our interactions with CCCP were very positive, beginning with the first on-site visit to the final startup and training. CCCP's salespeople and technicians were knowledgeable and were a pleasure to work with.
